- 6 6. Spoon the banana mixture into the flour and sugar and then fold it in lightly and gently, not for too long

Cooks Note

Banana muffins are not too high in sugar compared with most cakes, with some of the sweetness coming from the fruit, and I prefer to make the smaller "fairy cake" muffins rather than the large cupcake size. However, the chocolate icing is truly luscious but really indulgent!

I made the iced muffins as a special treat for a party, but if you want just that taste of chocolate without quite so much sugar, you can omit the icing and make chocolate chip banana muffins instead. Simply add two handfuls of small dark chocolate chips to the muffin mixture and fold them in gently before baking.

This recipe makes about 22 small muffins; I used fairy cake paper cases in patty tins, but you could make mini muffins instead.
